

PWR is an ecosystem of bike and outdoor products that share their battery. But that battery also works as a power bank to charge your devices.

BIKE LIGHTS USES MODEMAKER APP

1000 LUMENS /
5000mAh

PWR MOUNTAIN
1800 LUMENS /
10,000mAh

PWR LANTERN

PWR SOUND

PWR HEADTORCH

“Charger” bike lights

These lights have an integrated PWR Bank. Just take the cap off the back and charge your devices.

They can even charge your devices - like the phone or Garmin on your handlebar - whilst in use.

“Modular” bike lights

These lights have interchangeable parts - so all lightheads can fit on all PWR Banks.

Furthermore their PWR Banks are compatible with the outdoor range. —>

“Outdoor” products

COMING EARLY 2018

These outdoor products all use the PWR Banks that are included in the modular lights.

So if you have already got a PWR bike light, you already have the battery for these products. Just like the Ryobi power tool.
